

New product makes lambing easy!

The Four Season Company proudly releases a new product.

PRE-LAMB

Pre-lamb is a 20kg block designed to make it easier for you at lambing. James Dickson National Sales Manager comments on the new product.

“**Pre-lamb** has been formulated especially for lambing ewes ideally fed out over a 12 week period. Suited for mainly green times, **Pre-lamb** is extremely high in cottonseed Meal which is a crucial source of Bypass protein.”

“A balanced protein and mineral supplement, **Pre-lamb** is the perfect block for lambing ewes. It will produce a lot more colostrum and milk, therefore helping your ewes. Your lambs will then have a much higher chance of survival.”

“From East to West **Pre-lamb** has created a lot of interest. I think farmers see how important it is to look after their ewes, especially at lambing.”

“In farming today, the key to success is to produce as much as possible out of limited resources. **Pre-lamb** will give you the edge in lamb production. It doesn't matter whether your interest is in meat or wool, the more lambs the more profit.”
