

# BENTONITE PLUS

## A Salt based Feed block containing Bentonite

A Salt based / bentonite block designed for lush green pastures. Bentonite used as a ruminant pasture supplement, has been advocated by many as a natural rumen protozoal controlling agent. The elimination of populations of rumen protozoa in sheep and cattle allows increased production of rumen bacteria and rumen fungi, which in turn increases rumen digestive efficiency. Protozoal populations are known to strip protein from the digestive system, which in turn drops ruminant productivity.

By supplying a convenient source of bentonite, salt and trace elements in a pasture block, using BENTONITE PLUS is a sound management tool when pasture is high in protein and moisture. Supplemented bentonite is also known to have properties that can slow down the passage of pasture through the rumen in lush green conditions.

If your stock need a safe and efficient source of salt, as well as the benefit from bentonite, then BENTONITE PLUS is an ideal supplement for all stock grazing pasture.

### Average Consumption rates:

**Cattle:** Approx. 1 block per 10 head

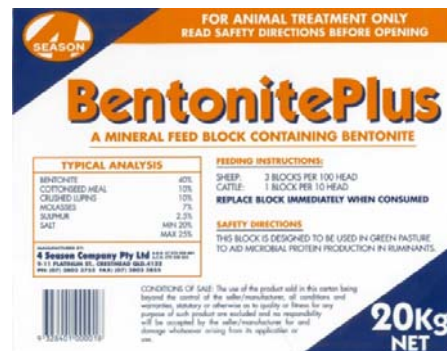

**Sheep:** Approx. 3 blocks per 100 head

Also suitable for Goats, Horses and Deer.  
Replace block immediately when consumed

### \*TYPICAL ANALYSIS

Bentonite	400	g/kg	40.0%
Cottonseed Meal	100	g/kg	10.0%
Crushed Grain	100	g/kg	10.0%
Molasses	70	g/kg	7.0%
Sulphur (S)	25	g/kg	(Min) 2.5%
Salt	Min		20.0%
	Max		25.0%

Note: The above analysis represents the constituent ingredients and relative proportions of the typical product only. Actual constituent ingredients and relative proportions may vary from that outlined above.

**Net Weight:** 20kg blocks
