

BIG P

High Phosphorus High Nitrogen

Most Northern Australian ruminants are known to need extra Phosphorus (P) supplementation. P deficiencies can lead to poor fertility and growth rates in breeding cattle and their offspring. BIG P offers a blend of P and urea to provide a balance of phosphorous and protein for cattle in a hard pressed 100kg block form.

Phosphorus is critical in helping cows synthesize pasture protein in green feed conditions. Normally, once P levels are satisfied in breeding cows, weight gains occur in green feed conditions by way of better conversion of protein. This process in turn generally leads to increases in weight gains in cows, leading to a higher joining weight, leading to increased fertility levels in supplemented groups of cows.

Because pastures and feed can vary so much from month to month, BIG P offers excellent nutritional pasture protection for breeding cattle in tropical conditions. Cattle simply help themselves as per their requirement.

Initially, consumption of BIG P could be double normal levels of consumption until cows and heifers balance their diet with pasture.

BIG P is easy and effective to use, and will lift your breeders' pasture performance.

*TYPICAL ANALYSIS

Phosphorus	50g/kg	5.0%
Calcium (Ca)	115.5g/kg	11.55%
Urea	100g/kg	10.0%
Cottonseed Meal	50g/kg	5.0%
Crushed Lupins	50g/kg	5.0%
Minimum Crude Protein		31.35%
Molasses		7.0%
Salt (Min)		35.0%
Salt (Max)		40.0%
Magnesium (Mg)	50g/kg	
Iron (Fe)	100mg/kg	
Vit.A	20iu/kg	
Vit.E	30iu/kg	

*Note: The above analysis represents the constituent ingredients and relative proportions of the typical product only. Actual constituent ingredients and relative proportions may vary from that outlined above.

Net Weights: 30kg and 100kg blocks

Average Consumption rates:

Cattle: 4 blocks per 100 head per 12 days

Sheep: 3 blocks per 100 head for 45 days

Replace immediately when consumed

WARNING: This product contains Urea that maybe harmful to animals if not properly administered. Do not feed to starving animals or animals in poor condition. Make sure that a bulk of roughage is always available when feeding this product. Do not place this product near dams or creeks as cattle may roll block into water. Do not feed out other Urea products while feeding this product
