

COW & CALF

A Nutritional Supplement for Cows and Calves

Calving is a critical time for breeding stock. Good mothers need excellent nutrition before and after calving, to ensure the health of their calves and themselves. COW & CALF is a balanced mineral block with bypass proteins, magnesium, selenium and other essential macro and micro vitamins and minerals.

Pastures constantly change in nutritional quality. COW & CALF has been designed to compliment nutrition in cattle's diets throughout the calving period.

It has been designed to be fed out 4 weeks prior through to 8 weeks after calving has finished.

COW & CALF is one solution available to cattle producers who believe in the essence of simple yet sound supplementation. In our view, cattle are adequately able to help themselves to supplements as they need it, as long as enough supplements are made available for all stock to have access. COW & CALF has been designed to be fed out in all pasture and weather conditions.

*TYPICAL ANALYSIS

Bypass Protein Meal	40.0%
Min Equivalent Protein	14.0%
From Natural Resources	
Molasses	10.0%
Salt (NaCl) Min	20.0%
(NaCl) Max	25.0%

Key Macro Ingredients

Magnesium (Mg)	2.0%
Calcium (Ca)	8.0%
Phosphorus (P)	1.0%
Sulphur (S)	1.0%

Key Micro Ingredients

Potassium (K)	200 mg/kg
Iodine (I)	300 mg/kg
Copper (Cu)	1000 mg/kg
Cobalt (Co)	100 mg/kg
Vit A	100 iu/kg
Vit E	500 iu/kg

Note: The above analysis represents the constituent ingredients and relative proportions of the typical product only. Actual constituent ingredients and relative proportions may vary from that outlined above.

COW & CALF summary: -

- Excellent mineral, vitamin and trace element balance
- Source of high quality bypass protein
- Magnesium and Selenium enriched
- All weather resistant
- 24 hour pasture supplement protection, as cattle need it
- Ideal for calving

Average Consumption rates:

Cattle: Approx. 4 blocks per 100 heads per 7 days

Note: Average block consumption can double in poor conditions.

Net Weights: 20kg & 100kg blocks
