

ELMS GREEN FEED BLOCK

Elders Livestock Management Solution (ELMS) provides proven and easy to use management techniques that helps animals use feed, pasture, fodder crops, grains & supplements more effectively & efficiently. The **ELMS GREEN FEED BLOCK** has been designed to deliver the highest levels of feed efficiency, health & productivity Australian farmers need to drive their profitability.

Grazing green feed and crops - understanding the critical issues.

Green pastures and crops are generally an excellent source of energy and protein for sheep and cattle. In most cases, however, they contain quite a poor balance of those nutrients critical to maintaining optimum health and productivity in the animals grazing them.

This nutrient imbalance can significantly reduce an animal's ability to efficiently convert the available feed into meat, milk or wool. It may also substantially reduce their natural ability to resist infections including parasites.

In some cases the effects of this poor nutritional balance are so severe that animals could suffer from bloat, scouring, grass tetany, hoof and skin problems and possibly red gut. Effects could also contribute to infertility, weaker cycling behaviours, implantation failures or early embryonic deaths in pregnant cows and ewes.

ELMS GREEN FEED BLOCK has been built using advanced ELMS carbohydrates, bypass protein, vitamins & mineral technologies to deliver more than any standard block on the market. Putting such technologies into a block form makes it easy to feed out such packed nutrition.

ELMS GREEN FEED BLOCK is a very cost effective way of getting your stock to achieve high levels of productivity, even during green feed times.

Features

- » Supplement containing an appropriate combination and level of the nutrients required by sheep and cattle to perform at their peak whilst grazing green pastures and fodder crops
- » Contains high levels crushed grains, carbohydrates, and bypass protein and a specially prepared blend of both normal and high availability forms of vitamins and minerals
- » Contains over 8% Magnesium
- » Designed to stimulate the rumen to allow animals to deliver higher levels of feed efficiency
- » Premium green feed supplement safe for both Sheep and Cattle

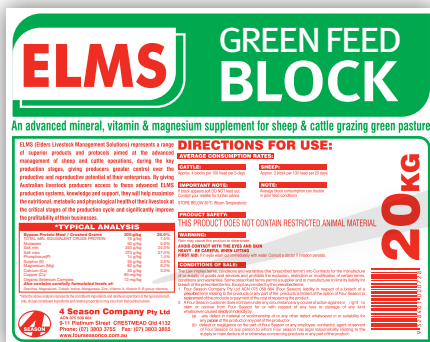

Benefits

- » Supported with the best technical advice to give you peace of mind
- » Readily available from your local Elders Branch
- » A premium block that nutritionally will assist sheep and beef producers to maximise production anywhere in Australia
- » Hard pressed block to help limit intake
- » Weather resistant

Approximate Cost

- » Sheep @ 20 grams/hd = \$0.03cents/day
- » Cattle @ 100 grams/hd = \$0.15cents/day

Also available in a 100kg block.

*TYPICAL ANALYSIS		
Bypass Protein Meal / Crushed Grains	300 g/kg	30.0%
TOTAL MIN. EQUIVALENT CRUDE PROTEIN	75 g/kg	7.5%
Molasses	50 g/kg	5.0%
Salt min	240 g/kg	24.0%
Salt max	270 g/kg	27.0%
Phosphorus(P)	14 g/kg	1.4%
Sulphur (S)	35 g/kg	3.5%
Magnesium (Mg)	82 g/kg	8.2%
Calcium (Ca)	30 g/kg	3.0%
Copper (Cu)	80 mg/kg	
Organic Selenium Complex	12 mg/kg	
Also contains carefully formulated levels of: Starches, Magnesium, Cobalt, Iodine, Manganese, Zinc, Vitamin A, Vitamin E, B group vitamins.		

*Note the above analysis represents the constituent ingredients and relative proportions of the typical product only. Actual constituent ingredients and relative proportions may vary from that outlined above.
