

PRO-40

A Premium Protein Supplement for Sheep and Cattle

A 100kg 12% urea block for sheep and cattle grazing dry pasture. PRO 40 allows large numbers of stock to be efficiently fed at lesser intervals. One 100kg block can feed 100 head of cattle, or 1000 sheep for a week, allowing stock to digest more dry pasture, leading to higher production rates and more matter consumed.

PRO 40 is a safe and efficient supplement to feed out all the time during a dry period, ideal for all cattle and sheep. It also contains balanced combinations of bypass meal, crushed lupins and urea to give an extended rumen stimulation time, meaning that more dry feed is properly digested over longer time periods.

*TYPICAL ANALYSIS

Urea	120 g/kg	12.0%
Bypass Protein Meal	100 g/kg	10.0%
Crushed Lupins	100 g/kg	10.0%
Min Equiv. Crude	336 g/kg	33.6%
Urea from natural Sources		
Min Crude Protein	67g/kg	6.7%
From natural sources		
Total Minimum	403 g/kg	40.3%
Crude Protein		
Molasses	50 g/kg	5.0%
Salt Min		40.0%
Max		44.0%
Macro Ingredients		
Phosphorus (P)	20 g/kg	2.0%
Calcium (Ca)	40 g/kg	4.0%
Sulphur (S)	25 g/kg	2.5%
Micro Ingredients		
Magnesium (Mg)	100 mg/kg	
Potassium (K)	25 mg/kg	
Cobalt (Co)	10 mg/kg	
Copper (Cu)	20 mg/kg	
Zinc (Zn)	50 mg/kg	
Manganese (Mn)	5 mg/kg	
Vit A	50 iu/kg	
Vit E	80 iu/kg	

Note: The above analysis represents the constituent ingredients and relative proportions of the typical product only. Actual constituent ingredients and relative proportions may vary from that outlined above.

Average Consumption rates:

Cattle:

100-200g per head per day
On average 100 head should consume 4 block every 10 days

Sheep: Approx. 3 blocks per 100 heads per 45 days.

Before feeding PRO 40, we advise to always feed out SALT first, for a period of 7 days— this will help prepare Rumen Bacteria for Urea feeding.

Net Weights: 30kg and 100kg blocks

WARNING: This product contains Urea that maybe harmful to animals if not properly administered. Do not feed to starving animals or animals in poor condition. Make sure that a bulk of roughage is always available when feeding this product. Rain may cause this product to deteriorate. Do not place this product near dams or creeks as cattle may roll block into water. Do not feed out other Urea products while feeding this product
