

TRACE Double Iodine

A Mineral / Trace Element Supplement for Sheep and Cattle

Originally, Trace was a standard mineral block designed to help combat sub clinical mineral deficiencies, especially in coastal areas for cattle. However, over the past 4 years, wool growers in the New England area of NSW have been testing TRACE blocks boosted with extra Iodine, Sulphur and Selenium. Wool growers for some time have known that early block supplementation prior to winter lambing has always proved profitable, especially using high iodine blocks. Increasing numbers of wool growers now have started feeding TRACE+ DOUBLE IODINE on a 365 day basis, owing to pasture quality variations. Sheep seem to vary intake of the block at various times of the year. Surprisingly, block intake can be very high when pasture is at its most green and lush.

The lesson learnt is that it is impossible for someone to judge when sheep need extra nutrition just by looking at pasture or the sheep's condition. If a ewe's body condition has slipped visibly before feeding takes place, then it may well be too late. TRACE + IODINE will help mineral pasture deficiencies when fed out all year.

TRACE DI supplement mineral blocks are also available in the following combination:

TRACE Double Iodine plus 4% Urea

*TYPICAL ANALYSIS

Iodine (I)	1500 mg/kg	
Sulphur (S)	25 g/kg	2.5%
Crushed Lupins	50 g/kg	5.0%
Molasses	50 g/kg	5.0%
Salt (NaCl) Min.	400 g/kg	40.0%
Salt (NaCl) Max.	380 g/kg	38.0%
Calcium (Ca)	150 g/kg	15.0%
Selenium (Se)	56 mg/kg	
Copper (Cu)	2000 mg/kg	
Colbalt (Co)	500 mg/kg	
Magnesium (Mg)	4000 mg/kg	

Note: The above analysis represents the constituent ingredients and relative proportions of the typical product only. Actual constituent ingredients and relative proportions may vary from that outlined above.

Average Consumption rates:

Cattle: Approx. 3 blocks per 100 heads per 7 days

Sheep: Approx. 2 blocks per 100 heads per 7 days.

Note: Average block consumption can double in poor conditions.

Net Weights: 20 kg & 30kg blocks

UREA WARNING: Products containing Urea maybe harmful to animals if not properly administered. Do not feed to starving animals or animals in poor condition. Make sure that a bulk of roughage is always available when feeding this product. Rain may cause this product to deteriorate. Do not place this product near dams or creeks as cattle may roll block into water. Do not feed out other Urea products while feeding this product
