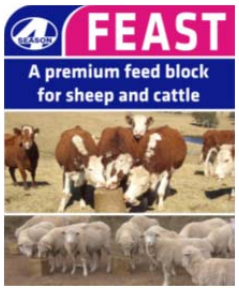
4 SEASON
Premium Animal Nutrition

Feast

An Ultimate Protein Feed Block for Cattle and Sheep

A premium protein block for sheep and cattle. Balanced blends of bypass protein, crushed grain and minimal urea levels make this block one of the premium protein blocks in Australia. FEAST allows cattle and sheep to successfully convert more pasture feed to body protein, especially in dry or wintry feed conditions.
FEAST also contains superior levels of minerals and trace elements to complement most pasture deficiencies. Proper supplementation of stock lifts body weight gains, and increases productivity on your farm. Stock just take what they need from FEAST to keep on growing, by the action of improving rumen efficiency.

FEAST is an excellent way to ensure that your stocks are given a massive lift in their diet, efficiently and economically.



Available in 25kg and 90kg
