INTRODUCING

## MINERALS PLUS

**A high consumption molasses/mineral block suitable for all grazing livestock, boosted with phosphorus, calcium and selenium.**

Australia is the oldest land mass on the planet. Its soil is also one of the most mineral deficient. One limiting factor in many pastoral enterprises is the lack of minerals in ruminants' diets. Containing only naturally occurring minerals, stock will enjoy the readily available nutrition in this handy and useful product.

MINERALS PLUS has been designed to provide a complex balance of minerals for all animals on all types of pasture. Animals will freely consume MINERALS PLUS as they require, according to their individual requirements and / or pasture deficiencies. Your animals will freely choose how much they need every day, owing to the attractive and energy rich molasses based formula.

Available in many sizes for your situation, MINERALS PLUS has been manufactured using high quality natural products. Only the finest ingredients are used. Whether it's grazing oats or cereal crops, improved or native pasture, MINERALS PLUS provides a balanced and sensible way to ensure that stock have access to a valuable source of quality nutrients.

Please take a look at the video link below, to see the blocks being feed out, at our Research and Development property in Goulburn
